PROFILE

Frontend Developer with commercial experience since 2023. I specialize in building websites and web applications with complex business logic, including customer portals, payment interfaces, information portals, and interactive websites. I independently manage the frontend development lifecycle, from architecture design to production-ready products, with a focus on usability, code quality, and development automation.

SKILLS & TECHNOLOGIES

Core: JavaScript, TypeScript, React, Next.js, SCSS, Responsive Design, Semantic HTML
Architecture & Data: REST APIs, SSR, Dynamic Routing, State Management, Forms & Validation, SEO
Animation & Interfaces: GSAP, Three.js, Splide, Figma
Tools: Git, Vite, Node.js, Axios, Redux Toolkit, Zod, PM2

WORK EXPERIENCE

ADVLine · Frontend Developer · August 2023 — Present

Independently responsible for the full frontend development lifecycle, from architecture design and component development to business logic implementation, production builds, and application deployment.

- WEBA — Customer Portal. Developed a customer portal for an internet service provider, featuring authentication, plan and service management, balance display, and payment workflows. Subscribers can manage their internet connection and payments independently.
- WEBA — Coverage Area. Extended an existing website with dynamic address-specific pages, an interactive map, and internet availability checks. Implemented server-side data fetching and SEO metadata to improve the search visibility of address-specific pages.
- ADVLine — Corporate Website. Developed a corporate website presenting the company's services, including a blog with dynamic article pages and content management through an admin panel.
- PARADOCS — Advertising Management Platform Website. Implemented a product presentation website with interactive and animated sections to demonstrate the advertising platform's capabilities.
- Animation & Interactivity. Create complex interface animations and 3D model effects synchronized with page scrolling for interactive product presentations.
- Development Automation. Created project templates and scripts for image processing and generating TypeScript interfaces from JSON, reducing repetitive manual work.

EDUCATION

2018 · Saint Petersburg State Chemical and Pharmaceutical Academy. Higher education in Biotechnology Engineering.
